

SIANTAR – PARAPAT RAILWAY

Project Description

Railway has become essential thing to support the mobility of communities to drive economic growth. This infrastructure project aimed to support land connectivity to the world-class tourism destinations, Lake Toba. Siantar-Parapat railway is an addition of existing railway lane in North Sumatra that crosses Langkat Regency, Binjai City, Medan City, and Simalungun Regency to increase efficiency in transportation mode. We hope by increasing the efficiency in transportation will attract many tourists visiting North Sumatra.
